

Age / Gender: 71/Male  
Patient ID: 1311828  
Patient Name: Jamil Parkar

Date and Time: 7th Jan 25 11:47 AM

AR: NA

VR: 66bpm

QRSD: 98ms

QT: 372ms

QTcB: 390ms

PRI: 220ms

P-R-T: 33° NA 4°

The ECG shows mostly normal findings for Mr. Parkar. A slightly prolonged PR interval suggests a possible first-degree heart block, which is generally not serious but warrants monitoring. The physician should consider the clinical presentation along with this ECG data to make an accurate diagnosis.
