

Age / Gender: 67/Male
Patient ID: 1308211
Patient Name: Moses Rafael Joseph

Date and Time: 31st Dec 24 11:35 AM

AR: NA VR: 69bpm QRSD: 98ms QT: 340ms QTcB: 364ms PRI: 218ms P-R-T: 47° NA 29°

The ECG report shows mostly normal findings.

Patient ID: 1308211

Patient Name: Moses Rafael Joseph

Age / Gender: 67/Male

Date: 31st Dec 24 11:35 AM

Summary of ECG Report

Based on the ECG report for Moses Rafael Joseph, here are the key findings and what they might indicate:

Heart Rate (VR): 69 bpm

This is within the normal resting heart rate range for adults (60-100 bpm).

QRS Duration (QRSD): 98 ms

This is within the normal range (less than 120 ms), indicating normal ventricular depolarization.

QT Interval (QT): 340 ms

This is within the normal range for men (generally less than 450 ms), indicating normal ventricular repolarization.

Corrected QT Interval (QTcB): 364 ms

This is also within the normal range, which is important for assessing the risk of arrhythmias.

PR Interval (PRI): 218 ms

This is slightly prolonged (normal is 120-200 ms), which might indicate first-degree heart block. This condition is usually benign but should be monitored.

P-R-T Angles: 47° NA 29°

These angles provide information about the electrical axis of the heart. The values here are within normal limits, though the meaning of "NA" requires clarification from the original report.

Summary:

The ECG report shows mostly normal findings.
