

Age / Gender: 71/Male
Patient ID: 1311828
Patient Name: Jamil Parkar

Date and Time: 7th Jan 25 11:47 AM

AR: NA VR: 66bpm QRSD: 98ms QT: 372ms QTcB: 390ms PRI: 220ms P-R-T: 33° NA 4°

The ECG report shows mostly normal findings for Mr. Parkar. A slightly prolonged PR interval suggests a possible first-degree heart block, which usually isn't serious but warrants monitoring. Further investigation may be needed based on clinical symptoms.
